

# Chandler **kids** for Conservation

Lindsay Miller • Kyrene del Sureno • Mrs. Lalley

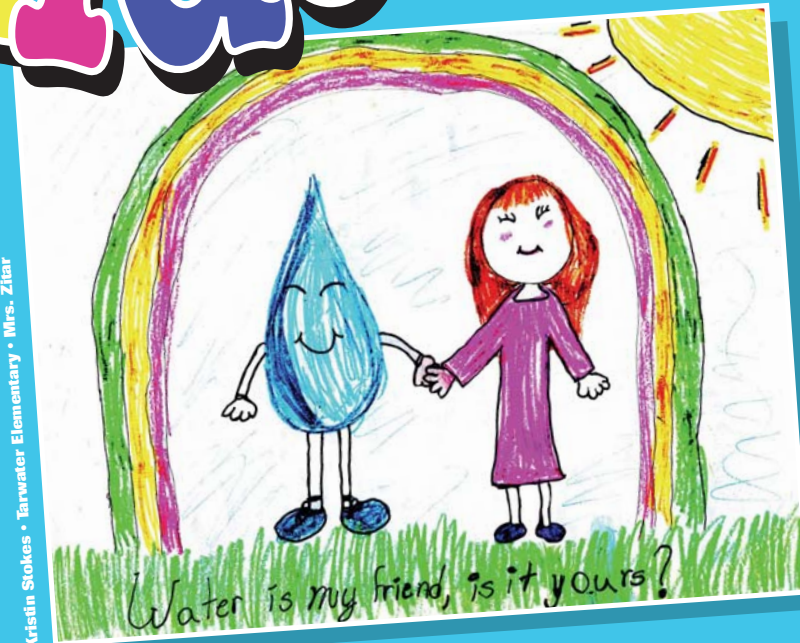

## recycling

### Recycling Tips:

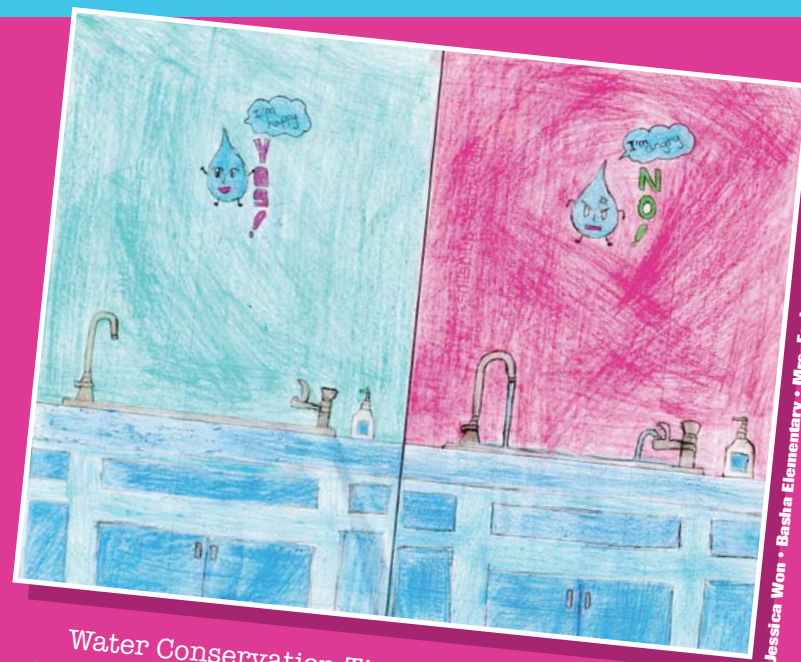

- When one aluminum can is recycled, enough electricity is saved to operate your t.v. or computer for three hours.
- It takes 1 million years for a glass bottle or jar to decompose in a landfill. RECYCLE green, brown and clear bottles and jars.
- Each person produces about 4 pounds of garbage every day. What's in your trash? RECYCLE paper, aluminum and tin cans, cardboard and more!
- Americans use 4 million plastic bottles every hour, but only 1 bottle out of every 4 is recycled. RECYCLE or REUSE your plastic bottles!

Czarina Gardolosa • Kyrene del Sureno • Mrs. Lalley

Kristin Stokes • Tarwater Elementary • Mrs. Zitar

Jessica Won • Basita Elementary • Mrs. Fozler

### Water Conservation Tips:

- Less than 1% of the water on earth is fresh and available to drink.
- All the water on the earth is recycled. We are drinking the same water today that the dinosaurs drank.
- It takes 616 gallons of water to make a hamburger.
- If you limit your showers to 5 minutes, you can save over 1,000 gallons of water a month.

## water conservation

Kaylyn Ruff • Bologna Elementary • Mr. Muroz

## storm water

### Storm Water Tips:

- Water flowing out of storm drains goes untreated into local lakes, parks and retention basins.
- Pick up trash and pet waste so it doesn't end up in the storm drain.
- Polluted run off is the nation's greatest threat to clean water.
- One gallon of motor oil can pollute 250,000 gallons of drinking water.

Boston Wilow • Andersen Elementary • Mrs. Simpson
